Getting Started

System Requirements

- \$1: Version 6.0 or higher
- \$1: Version 11.0 or higher
- \$1: Minimum 100MB free space
- \$1: Internet connection for synchronization
- \$1: For thermal printer connectivity

App Installation

- 1. Download the Oro Ticket App from your company's app store
- 2. Install the application on your device
- 3. Grant necessary permissions when prompted:

- Location access
- Bluetooth connectivity
- Storage access
- Camera (for QR code scanning)

First-Time Setup

Initial Password Setup

When launching the app for the first time:

- 1. \$1
- Enter a strong password (minimum 8 characters)
- Confirm your password
- Tap "Reset Password"

- 2. \$1
- Enter your company email address
- Enter your password
- Tap "Sign In"

Profile Synchronization

After successful login, the app will:

- Download your user profile
- Sync company information
- Load assigned vehicles and routes
- Download commission rules
- Update local data

\$1: This process requires an internet connection. If offline, you'll be prompted to connect.

Daily Operations

Morning Setup

1. \$1

- Open Oro Ticket App
- Authenticate if required

2. \$1

- Review today's service charges
- Check assigned vehicles
- Verify data synchronization status

3. \$1

- Ensure thermal printer is connected
- Check printer paper supply
- Verify Bluetooth connectivity

Ticket Sales Process

Step 1: Access Ticket Creation

1. From the dashboard, tap "New Ticket" or navigate to the Ticket module
2. The app will display available options

Step 2: Select Vehicle

1. Choose from your assigned vehicles
2. The app will load vehicle-specific information:
 - Seat capacity
 - Available routes
 - Current tariffs

Step 3: Configure Route

1. \$1: Automatically set based on your assignment
2. \$1: Select from available destinations
3. \$1: Enter number of passengers (1-50)

Step 4: Review Charges

The app automatically calculates:

- \$1: Distance-based pricing
- \$1: Commission-based fee
- \$1: Sum of tariff and service charge

Step 5: Print Ticket

1. Connect to thermal printer via Bluetooth
2. Tap "Print Ticket"
3. The system generates and prints:
Company header
Ticket details
QR code for verification
Ethiopian date/time

Step 6: Record Trip

1. After printing, tap "Record Trip"
2. Confirm trip details
3. Data is stored locally and marked for synchronization

End-of-Day Procedures

1. \$1

Navigate to Sync module
Tap "Sync All Data"
Wait for confirmation

2. \$1

Access Reports section
Generate daily summary
Export or share as needed

3. \$1

Ensure all data is synced
Tap logout (app prevents logout with unsynced data)

Ticket Management

Ticket Information Display

Each ticket contains:

- \$1: Logo, name, contact details
- \$1: From, To, Date, Time
- \$1: Plate number, level, capacity
- \$1: Tariff, service charge, total
- \$1: QR code and unique ticket number

Ticket Formats

Standard Ticket Format

Offline Ticket Issuance

When internet is unavailable:

1. All ticket creation works normally
2. Tickets are stored locally
3. Synchronization occurs when online
4. Digital receipts available if printing fails

Trip Recording

Manual Trip Entry

1. \$1

Navigate to Trip section

Tap "Add Trip"

2. \$1

Select vehicle

Choose route (departure/arrival)

Enter actual distance traveled

Record passenger count

Enter revenue collected

3. \$1

Save trip locally

Sync when online

Automatic Trip Recording

For integrated systems:

GPS tracking (future feature)

Automatic route detection

Real-time revenue calculation

Reporting

Available Reports

Daily Trip Report

1. \$1: Reports ☐ Trip Reports ☐ Daily

2. \$1: Date range, vehicle, route

3. \$1:

Trip count

Total revenue

Distance traveled

Service charges collected

Service Charge Report

1. \$1: Reports ☐ Service Charges ☐ Daily

2. \$1: Date range, employee

3. \$1:

Total service charges

Commission earned

Payment summaries

Vehicle Utilization Report

1. \$1: Reports ☐ Fleet ☐ Utilization

2. \$1: Date range, vehicle

3. \$1:

Trips completed

Revenue generated

Distance traveled

Fuel efficiency

Report Generation

PDF Export

1. Apply desired filters
2. Tap "Generate PDF"
3. Choose save location
4. PDF includes:
 - Company header
 - Report data in tabular format
 - Summary statistics
 - Generation timestamp

Data Export

1. Select export format (CSV, Excel)
2. Choose date range
3. Export includes raw data for analysis

Data Synchronization

Manual Synchronization

1. \$1
 - Navigate to Sync section
 - View synchronization status
2. \$1
 - \$1: Complete data synchronization
 - \$1: Upload trip data only
 - \$1: Upload service charges only
 - \$1: Refresh local data
3. \$1
 - Progress indicators
 - Success/error notifications
 - Retry failed operations

Automatic Synchronization

- \$1: Occurs when app is online
- \$1: Data refresh after authentication
- \$1: Regular data updates (configurable)

Sync Status Indicators

- \$1: Fully synchronized
- \$1: Partial synchronization
- \$1: Synchronization failed
- \$1: Offline mode

Troubleshooting

Common Issues and Solutions

Login Problems

\$1: "Invalid credentials"

\$1:

Verify email and password

Check internet connection

Contact administrator for password reset

\$1: "Account locked"

\$1:

Wait 30 minutes for automatic unlock

Contact IT support

Printing Issues

\$1: "Printer not found"

\$1:

Check Bluetooth is enabled

Ensure printer is powered on

Verify printer compatibility

Try reconnecting device

\$1: "Paper jam"

\$1:

Clear paper jam

Check paper quality

Realign paper

Synchronization Problems

\$1: "Sync failed"

\$1:

Check internet connection

Verify server availability

Retry synchronization

Contact technical support

\$1: "Data conflicts"

\$1:

Review conflicting data

Choose appropriate resolution

Save changes

App Performance

\$1: "App running slow"

\$1:

Close other applications

Clear app cache

Restart device

Update app to latest version

Error Messages

Authentication Errors

\$1: Re-login required

\$1: Restart app and login

\$1: Contact administrator

Network Errors

\$1: Work offline, sync later

\$1: Retry operation

\$1: Try again later

Data Errors

\$1: Check entered data

\$1: Verify unique constraints

\$1: Clear cache and re-sync

Best Practices

Daily Operations

1. \$1

Charge device fully

Test printer connectivity

Sync data before starting

2. \$1

Keep device secure

Backup important data

Monitor battery level

3. \$1

Sync all transactions

Generate daily reports

Secure logout

Data Management

1. \$1

Sync data multiple times daily

Don't accumulate unsynced data

Verify sync completion

2. \$1

Export important reports

Keep physical records

Use secure storage

Security Practices

1. \$1

Use strong passwords

Enable device lock

Don't share login credentials

2. \$1

Handle customer data carefully

Report security incidents

Follow company policies

Performance Optimization

1. \$1

Keep app updated

Clear cache regularly

Restart app daily

2. \$1

Keep sufficient storage space

Close unused applications

Regular device restarts

Advanced Features

Ethiopian Calendar Integration

\$1: All dates shown in Ethiopian calendar

\$1: Afaan Oromo day names used

\$1: 12-hour format with AM/PM

Multi-language Support

\$1: English

\$1: Afaan Oromo

\$1: Settings ☑ Language

Offline Capabilities

\$1: All features work offline

\$1: Operations queued for sync

\$1: Automatic conflict handling

Integration Features

\$1: Location-based features (future)

\$1: Ticket verification

\$1: Contactless operations (future)

Support and Contact

Technical Support

\$1: support@orotransport.et

\$1: +251-XXX-XXXX

\$1: Monday-Friday, 8:00 AM - 5:00 PM EAT

Emergency Support

\$1: Call emergency hotline

\$1: Contact IT immediately

\$1: Report within 24 hours

Training Resources

\$1: This document

\$1: Available on company portal

\$1: Scheduled sessions available

\$1: 1.0

\$1: November 2024
